The recorder is dedicated to work with AHD cameras, Nous 6000 series IP cameras and achieves the best functionally with them. In case of work with IP cameras intelligent image analysis, dualstream mode, PTZ control, motion detection and alami inputs / otubus functions depend on the functionality of the IP camera and the capabilities of the communication protocol. Detailed data on camera compatibility with recorders and compatible hard drives can be found in the compatibility tables available in the DOWNLOADABLE FILES tab. Display and playback speeds are achieved using dual stream. The recording speed of analog cameras may be limited during playback.
